Монтаж Assembly

Нанесите на фитинг тефлоновое или аналогичное покрытие для обеспечения большей герметичности соединения.

Place over the fitting a lay of insulating material (no hemp) in order to obtain a better tightness on the coupling.

Проверьте наличие избыточного количества указанного выше покрытия во избежание возможных поломок, вызванных чрезмерным закручиванием.

Please check if there isn't a surplus of above-mentioned coat, in order to prevent possible breakings caused by excessive screwing.

Соедините фитинг с контуром. Соблюдайте осторожность во избежание превышения усилия зажима фитинга. Пожалуйста, проверьте длину резьбы фитинга и закрутите трубу не более этой длины. Обязательно избегайте деформации.

Connect the fitting with the circuit. Pay attention to not exceeding in screwing. Please check fitting thread length and screw the pipe not more than this length. Be sure to avoid fitting deformation
